www.wallindustries.com

Wall Industries, Inc. produces world-class dc/dc converters and ac/dc power supplies, including medical power supplies and converters.

Founded in 1960, Wall Industries, Inc. is a global technology enterprise. Our manufacturing processes utilize the latest techniques, including surface-mount technology and stringent quality control methods. With in-house applications engineers, dedicated regional sales managers, and research and development teams, every project is ensured great success.

Medical Product Specifications

Wall Industries, Inc. offers a wide array of medical products approved to UL60601-1, and EN60601-1 standards. Many of our standard products also may be available in medical versions. All units are 100% burned in and load tested, and we provide unmatched engineering services as well as technical support.

Contact your representative or salesperson for further information on how Wall Industries, Inc. can provide medical power solutions to meet your needs

DC/DC Converters

We offer one of the most comprehensive product offerings in the industry, with power ranges from 1 to 720 watts. Standard and high density designs include a complete “brick” family, 1/8, 1/4, 1/2, and Point-of-Load. Features include wide input ranges, high efficiencies, remote on/off, single or multiple outputs, continuous short-circuit protection and more.

AC/DC Power Supplies

With power ranges from 3 to 3000 watts, these high reliability power supplies are available in open card, cased, and for some models, encapsulated formats. Features include universal input, soft-start, single and multiple outputs, and more. All open card and cased switchers are agency approved.

New Product Development

Our research and development teams are currently developing several new models which will provide exciting new possibilities for design engineers. In addition to our commitment to new product creation, we are also dedicated to continuous improvement of existing designs and models. Please contact us for more information on our entire product offerings.

Limitations of Use - Wall Industries, Inc. products are not authorized for use as mission-critical components in life-support, hazardous environments, nuclear, or aircraft applications without the express written approval of the President of Wall Industries, Inc.
