

News Release

Wall Industries is ITAR Certified

Exeter, NH, February 14, 2017 - Wall Industries, Inc. is pleased to announce that it is an International Traffic in Arms Regulations (ITAR) certified company. ITAR is a set of regulations, emplaced by the United States government, for controlling the export and import of defense-related articles and services listed on the United States Munitions List. The provisions of the Arms Export Control Act are implemented by ITAR's regulations and are described in Title 22 (Foreign Relations), Chapter I (Department of State), Subchapter M of the Code of Federal Regulations. ITAR is interpreted and enforced by the Department of State.

ITAR limits the sharing of defense and military related technologies (listed on the US Munitions list) to U.S. Persons only. Authorization from the Department of State or a special exemption is required if the need exists to share ITAR-protected materials, services, or information with foreign persons.

Wall has solved many challenging scenarios for military and defense applications by supplying power for equipment needed to serve in the desert with scorching temperatures or at sea with elements of vibration, salt air, and ocean water. Wall partnered to strategize, design, and deliver power in hardened, encapsulated, and ruggedized equipment.

Wall's capabilities include the following mil standards:

Mil-Std-1275 D	Military Vehicle Standards
Mil-Std-461 C, D, E	Electro Magnetic Emissions Requirements
Mil-Std-217	MTBF Standards
Mil-Std-810	Environmental Testing
Mil-Std-202	Standardized Test Methods
<i>-55°C to +125° C operating temps available upon request</i>	

Wall Industries also offers an array of screening options to meet both the needs set forth by Military Standards, and individual customer requirements.

Additional Capabilities

- 3D Mechanical Modeling based on COTS units
- Pre-Compliance Testing
- Analog design for input and output circuits

Customer peace of mind, protection, and satisfaction are important to Wall Industries and with ITAR in place, Wall can more effectively meet the confidentiality requirements of its customers.
