

Size: 7.15in x 4.00in x 2.92in

FEATURES

- 92% Efficient at Full Load
- 270 Watts Output Power
- No Internal Fan
- IEC-320-C14 AC Inlet
- Single Outputs from 12V to 48VDC Quazi Regulated (See Note 1)
- Active Power Factor Correction
- Short Circuit, Over Current, and Over Temp. Protection
- Universal Input Voltage Range: 100~240VAC
- 100% Burn-in
- Low Total Harmonic Distortion (THD)
- 7.15" x 4.00" x 2.92" Aluminum/Plastic Case
- Fixed Switching Frequency
- ISO9001 Compliant
- EN60950 on 24Vout model, all other pending
- EN55022 Class B Emissions
- EN61000-4-5 Surge Immunity
- EN61000-3-2 Harmonic Currents
- **Patent Pending**

DESCRIPTION

The FLEX series of AC/DC power supplies provides 270 Watts of output power in a 7.15" x 4.00" x 2.92" desktop style package with no internal fan. This series consists of single output models ranging from 12VDC to 48VDC with a universal input voltage range of 100-240VAC and an IEC-320-C14 AC inlet. Some features include active PFC, fixed switching frequency, and low THD. These supplies are protected against over current, short circuit, and over temperature conditions. All models have been 100% burn-in tested.

MODEL SELECTION TABLE

Model Number	Input Voltage Range	Output Voltage	Output Current	Ripple & Noise	Output Power
FLEX12S-270	115/230VAC (100~240VAC)	12VDC	22.5A	1000mVp-p Max.	270W
FLEX15S-270		15VDC	18A		270W
FLEX18S-270		18VDC	15A		270W
FLEX24S-270		24VDC	11.25A		270W
FLEX28S-270		28VDC	9.64A		270W
FLEX48S-270		48VDC	5.625A		270W

SPECIFICATIONS

All specifications are based on 25°C, Nominal Input Voltage, and Maximum Output Current unless otherwise noted.

DESIGN CONSIDERATIONS

Over Current Protection

The converter is protected from short circuit and over current conditions. Upon sensing a short circuit or an over current condition the converter output will begin to 'foldback'. Once the output has dropped to near zero volts, the output will shut off and after a short delay try to restart. This is called a 'hiccup' mode and this mode will persist until the short circuit or over current condition is removed.

Over Temperature Protection

The converter is protected from over temperature conditions

Fusing

The input to the converter is protected with a UL R/C fuse. This fuse is NOT user replaceable.

Emissions Accordance (pending)

- CFR Title 47 FCC Part 15 Subpart B, Class A
- ICES-003, Issue 4, Class A

COMPANY INFORMATION

Wall Industries, Inc. has created custom and modified units for over 50 years. Our in-house research and development engineers will provide a solution that exceeds your performance requirements on-time and on budget. Our ISO9001-2008 certification is just one example of our commitment to producing a high quality, well-documented product for our customers.

Our past projects demonstrate our commitment to you, our customer. Wall Industries, Inc. has a reputation for working closely with its customers to ensure each solution meets or exceeds form, fit and function requirements. We will continue to provide ongoing support for your project above and beyond the design and production phases. Give us a call today to discuss your future projects.
