

Size:

1.25 x 0.80 x 0.40 inches (31.8 x 20.3 x 10.2 mm)

Applications:

- Medical Equipment
- Telecom/Datacom
- Semiconductor Equipment
- Industry Control Systems
- PV Power Systems
- IGBT Gate Drivers

FEATURES

- 2µA Patient Leakage Current
- Single & Dual Outputs
- High Efficiency up to 89%
- 2:1 Wide Input Voltage Ranges
- Built-in EMI Class A Filter
- Up to 10 Watts Output Power
- 5000VAC I/O 2MOPP Isolation
- Reinforced Insulation for 250VAC Working Voltage
- Clearance and Creepage Distance: 8.0mm/2MOPP
- Short Circuit, Over Voltage, and Over Load Protection
- CE Marked
- . Compliant to RoHS II & REACH
- ANSI/AAMI ES60601-1, EN60601-1, IEC60601-1 3rd Edition, UL60950-1, EN60950-1, & IEC60950-1 Safety Approvals
- Optional Remote On/Off Control and Trim Pin

DESCRIPTION

The DCMPP10 series of medical DC/DC power converters provides up to 10 Watts of output power in a 1.25" x 0.80" x 0.40" DIP package. This series consists of single and dual output models with 2:1 wide input voltage ranges of 4.5-9VDC, 9-18VDC, 18-36VDC, and 36-75VDC. Some features include high efficiency up to 89%, 5000VAC I/O (2 MOPP) isolation, and -40°C to +105°C operating temperature range. These converters are also protected against short circuit, over voltage, and over load conditions. All models are RoHS compliant and have ANSI/AAMI ES60601-1, EN60601-1, IEC60601-1 3rd Edition, UL60950-1, EN60950-1, & IEC60950-1 safety approvals. Remote on/off and Trim functions are also available for this series.

NOTES

- 1. The "x" in the model number represents the Pin Connection type. It can be "A" for pin connection type A or "B" for pin connection type B. See mechanical drawings on page 4 for more information.
- 2. The DCMPP10 series meets EMI Class A without an external filter added. This series can only meet EMI Class B with external components added. Please contact factory for more information.
- 3. An external input filter capacitor is required if the module has to meet EN61000-4-4, EN61000-4-5.
 - For 5VDC nominal input models we recommend connecting an aluminum electrolytic capacitor (Nippon Chemi-con KY series, 1000μF/25V) and a reverse diode (Vishay V10P45) in parallel.
 - For 12VDC & 24VDC nominal input models we recommend connecting an aluminum electrolytic capacitor (Nippon Chemi-con KY series, 470µF/50V) in parallel.
 - For 48VDC nominal input models we recommend connecting an aluminum electrolytic capacitor (Nippon Chemi-con KY series, 330μF/100V) in parallel.
- 4. Remote On/Off control is optional and is only available for "B" type pin connection models. To order the converter with remote on/off add the suffix "-P" to the model number (Ex: DCMPP10-48S12B-P).
- 5. Trim function is optional and is only available for "B" type pin connection models. To order the converter with Trim pin add the suffix "-T" to the model number (Ex: DCMPP10-48S12B-T).

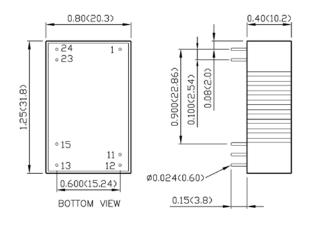

CAUTION: This power module is not internally fused. An input line fuse must always be used.

*Due to advances in technology, specifications subject to change without notice.

COMPANY INFORMATION-

Wall Industries, Inc. has created custom and modified units for over 50 years. Our in-house research and development engineers will provide a solution that exceeds your performance requirements on-time and on budget. Our ISO9001-2008 certification is just one example of our commitment to producing a high quality, well-documented product for our customers.

Our past projects demonstrate our commitment to you, our customer. Wall Industries, Inc. has a reputation for working closely with its customers to ensure each solution meets or exceeds form, fit and function requirements. We will continue to provide ongoing support for your project above and beyond the design and production phases. Give us a call today to discuss your future projects.
