**NOTES**

- (1) Models with a 4.5–9VDC input voltage range require a minimum order.
- (2) Typical value at nominal input voltage and full load.
- (3) Maximum value at nominal input voltage and full load
- (4) Typical value at nominal input voltage and no load
- (5) Test by minimum Vin and constant resistive load
- (6) The on/off control pin is referenced to –Vin.  
To order positive logic remote on/off, add the suffix “P” to the model number (Ex: JR24S15-660P)  
To order negative logic remote on/off, add the suffix “R” to the model number (Ex: JR24S15-660R)
- (7) “I” type models are more efficient; therefore they can be operated over a more extensive temperature range than the standard version. To order extended operating temperature range, add the suffix “-I” o the model number (EX: JR24S15-660-I)
- (8) Heatsink is optional and P/N: 7G-0020C-F.
- (9) The JR series can meet EN55022 Class A with external capacitors in parallel connected to the input pins.  
Recommended: 12Vin: 4.7µF/25V 1210 MLCC  
24Vin: 2.2µF/50V 1812 MLCC  
48Vin: 1.5µF/100V 1812 MLCC
- (10) An external inputp filter capacitor is required if the module has to meet EN691000-4-4, EN61000-4-5. The filter capacitor suffested is Nippon chemi-con KY series, 220µF/100V, ESR 48mΩ

**CAUTION:** This power module is not internally fused. An input line fuse must always be used.
