### DESCRIPTION

The LANCW5 series of DC/DC converters offers up to 6 watts of output power in an IC compatible 24 pin DIP configuration. The LANCW5 series has a 2:1 (W) wide input voltage of 9-18, 18-36, and 36-75VDC. The LANCW5 series also has a 4:1 (UW) ultra wide input range of 9-36 and 18-75VDC. This series is intended to provide power and isolation for applications requiring high power density. Some features include 1600VDC isolation, short circuit protection, and five-sided shielding. Also available are SMT type (suffix "S") and I type (operating temperature: -40°C~+85°C without derating- add suffix "I").

**NOTES**

- BELLCORE TR-NWT-000332. Case 1: 50% Stress, Temperature at 40°C. MIL-HDBK-217F Notice2 @ Ta=25°C, Full load (Ground, benign, controlled environment).
- Maximum value at nominal input voltage and full load of standard type.
- Typical value at nominal input voltage and no load.
- Typical value at nominal input voltage and full load.
- Test by minimum Vin and constant resistive load.
- The industrial "I" suffix for 2:1 version is more efficient, therefore, it can be operated in a more extensive temperature range than standard and I suffix 4:1 input versions.
- An external filter capacitor is required if the module has to meet EN61000-4-5. The filter capacitor suggested is Nippon chemi-com KY series, 220µF/100V, ESR 48mΩ.
- The LANCW5 Series can meet EMC EN55022 Class A and Class B with an external filter in parallel with the input pins. See page 3 for filter suggestions.
- There is no pin at PIN10 & PIN15 for LANC5UW series.
- For industrial temperature range add the suffix "I" to the model number.
- For SMT type add the suffix "S" to the model number.
- UL approval can be added to any products not currently listed if required.
